

Clone Spray

For accelerating root and foliage growth in clones and seeds

- **Helps reduce overall cropping time by promoting root development, typically within 4-7 days, followed by explosive root and foliage growth** through veg and early bloom.
- **Helps prevent transplant stress** and wilting of stems and leaves.
- **Absorption through the stomatal pathway is enhanced** via the use of foliar specific ingredients, application specific pH conditioners and a NON-TOXIC plant-specific wetting agent. NOTE, regular root enhancer additives are designed specifically for *root* uptake and are NOT ideal for foliar application.
- Dosage: 25 ml/L (25ml /Qrt). Apply through to early bloom.
- Available in: 1L // 5L // 20L

“Purified extracted organics” explained

The chemists at FloraMax have been able to deconstruct popular organic ingredients such as kelp, fulvic acid and guano then isolate specific ‘beneficial’ organic molecules. These are then incorporated into our additives in a purified and potent form. Importantly, this enables their concentrations to be optimized for maximum nutrient effect, with no negative side-effects. The result is a range of products that produce unique and tangible results without causing blocked drippers, pH fluctuation, build-up, foaming or odors.

Clone Spray produces explosive root growth.- P.B. Detroit Michigan

TESTIMONIALS

“For Clone Spray we had amazing root eruption...It broke our previous rooting record by 3 days” (Purchasing manager from one of USA’s largest chains)

“THIS IS THE BEST PRODUCT I HAVE EVER RECEIVED FROM A HYDRO SHOP. Not only does it do exactly what it says but there are so many different benefits in using this product...”
